Everything You Need for the Next Level

For FX/CFD trading to the next level

Backoffice

Manage liquidity, compliance, risk, trading and operations via one single back office.

Account System

Credit & margin, FIX, bridge, Omnibus, fund manager, IB accounts with easy conditions.

Liquidity and Risk Management

Manage trade risks with advanced settings, real-time monitors and liquidity pools.

Layered Roles

Dynamic roles including Admin, Manager, IB and Trader, to cater to different needs.

Liquidity Distribution

To your clients via Fortex frontends, Bridge, APIs and other platforms.

White-Label

Your own branded platform and you can also offer your white label service to your clients.

Pricing Engine

With high concurrency and low latency to provide a stable and robust quote stream.

Prime Broker

Integrate with banks, prime brokers, and post-trade processors for institutional workflow.

Order Matching

Set matching rules internally or externally to maximize profit and reduce risks.

Regulatory Reporting

Generate reports that meet all major regulatory requirements.

Clearing & Settlement Tech

Dynamic tech for exchange and OTC trades with banks, CCPs, and exchanges.

Connectivities

Connect XForce via FIX, MT4/5 Bridge, WebSockets, RESTful API, etc.

Think Bigger.
Aim Higher. Act Bolder.

XForce is more than a trading platform.
It's also a multi-task platform to elevate your business.

Liquidity Aggregator

Source and aggregate global multi-asset liquidity.

Bridge to other platforms

Bridging to your GUI, MT4/5, Fortex, FIX API, and other platforms.

Liquidity Distributing

Distribute liquidity on your own terms.

Risk & Execution Management

Manage trade flow in one centralized platform.

We've Got You Covered

A turnkey, cost-effective and worry-free solution.
You focus on your business. We focus on you.

Gateway to LPs Included

Built-in gateway to top 500+ LPs. No need to spend extra money for 3rd party LP gateways.

APIs for 3rd Party Vendors

Use API to connect your CRM platform or code your trading strategies, etc.

Premium Server Hosting and Network Included

Server hosting and premium global network included. Choose our data center at Equinix NY4, LD4, and HK1.

Extended 24*7 Expert Support

Our premium support is always here, 24*7. You focus on your client and trading. We focus on you.

Basic CRM

Built-in CRM and its API. Get your business up and running.

Customization Available

Customize further for your own workflow and brand awareness.

Use Case

Institutional & Retail Brokers

Leading institutional and retail brokers access liquidity and distribution liquidity via a single solution

You'll benefit from our electronic price distribution and e-trading workflows. You'll use the XForce Platform liquidity aggregator that connects to LPs and trading venues, from FX/CFD, equities, and futures liquidity for price construction, auto-hedging and redistribution.

Your risk and operations desk will use the Fortex UI to access liquidity from all your liquidity providers in the markets, providing razor-tight spreads, fast execution and customized liquidity to your clients.

You'll also be able to provide liquidity to Fortex clients, connecting as a liquidity provider and leveraging the Fortex Liquidity Network to increase your liquidity distribution and influence.

Use Case

Liquidity Providers

Low-cost liquidity distribution to FX/CFD players on Fortex Liquidity Network via a single API

You'll benefit from Fortex's complete liquidity customization across OTC markets to provide liquidity to a wide range of top-tier institutions, banks, retail brokers, corporates and broker-dealers.

You'll also benefit from the low-latency and cost-effective, highly configurable liquidity distribution solution to create more business opportunities and client success.

Use Case

Hedge Funds

Leverages XForce to trade multi-assets in global markets

Access and trade the global markets via one single platform. Gain better safety of funds via a managed and transparent trading workflow.

You'll benefit from trading with the best liquidity provider of your own choice and executing complex strategies on Fortex.

Fortex is the platform of choice because it's neutral, open and has a fully disclosed trading setup with LPs, ensuring more competitive pricing and higher fill rate for the fund managers and traders.
