

Fortex XCloud Hosting Solutions

How do we bring value to brokers?

1

Dedicated Hosting

Dedicated hosting server, with 99.99% high availability for top-notch infrastructure and high reliability.

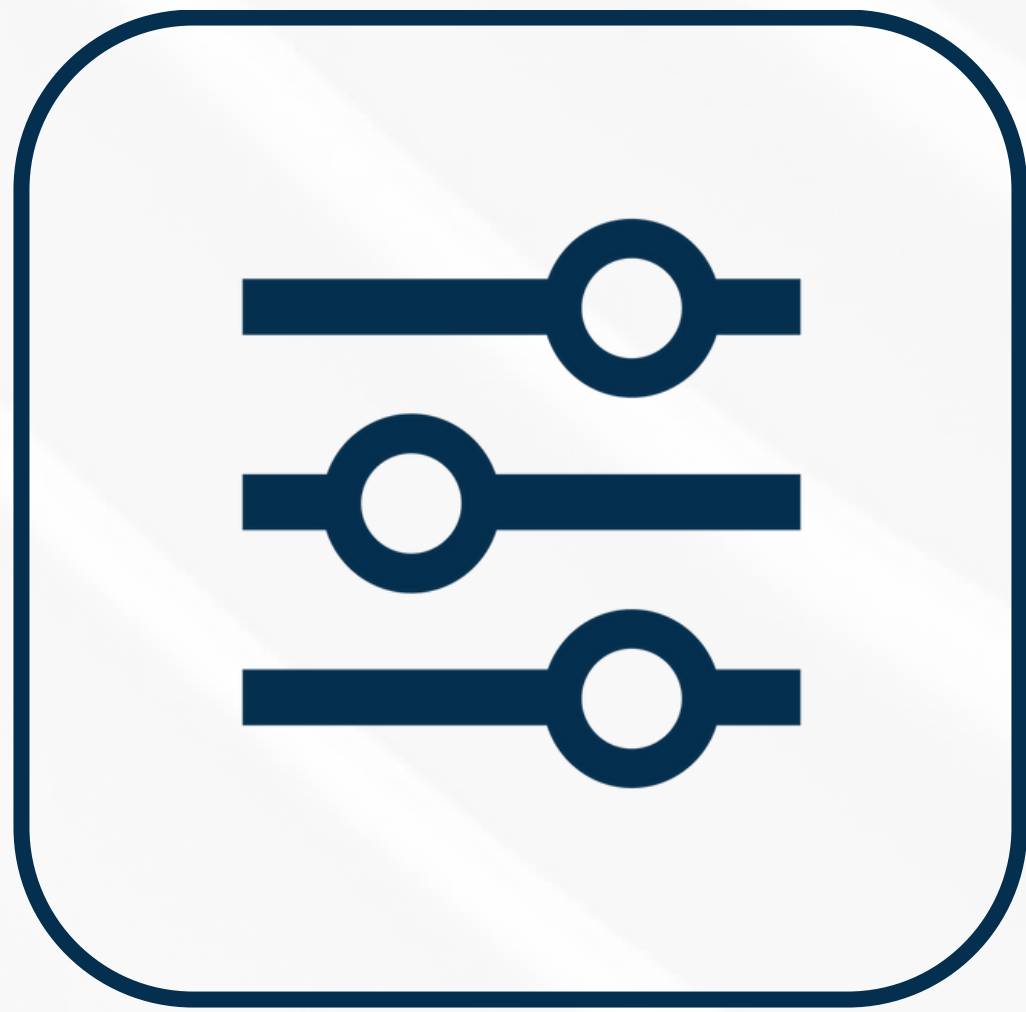

Fortex

High Scalability and Flexibility Cloud Hosting

Cloud computing technology infrastructure, scalable and flexible computing power to reduce latency and ensure high throughput performance, increasing the agility and efficiency of system operations.

Fortex

Cross-connect

Cross-connect with Fortex
Aggregator and to major top
banks, exchanges and LPs for
ultra-low latency and high
stability.

Carrier-class Security

High-performance firewalls, security protocols, and anti-DDoS protection against any mode of attack to ensure the safe business operation and avoid service downtime.

Fortex

Redundant Connectivity

Provide redundant connection network infrastructure, high-performance CPU, Raid array storage, multiple private network access, and multi-network ISP to ensure efficient business operation.

Premium Global Network

Server hosted at Equinix LD4, NY4, and HK1 with direct fiber optic connections in between to achieve a superior global network.
